

10 Reasons to Use Xenca Pet Nutrition

- 1. Developed in conjunction with Professor Mike Davies, BvetMed, CertVR, CertSAO, FRCVS, Nottingham School of Veterinary Medicine and Science.**
- 2. Formulations are evidence-based, developed from scientific and clinical research. Hence, these products should not be confused with other multi-nutrient products available in the general retail marketplace. All these supplements have been developed to meet specific, required criteria.**
- 3. Xenca Pet Care products are manufactured and assembled in our human food grade facilities and receive the same quality of handling and preparation.**
- 4. Xenca products are not tested on animals.**
- 5. The Healthy Heart product is formulated with nutrients known to be important for cardiac health and function, including amino acids, essential minerals (zinc and copper) and vitamins A, B complex and E.**
- 6. Joint Care contains the essential joint and tissue minerals calcium, zinc, phosphorus and vitamins A, C and D. To aid joint flexibility the well-known glucosamine and chondroitin sulphate are also included.**
- 7. The Healthy Skin and Coat products contain a blend of essential amino acids (rich in sulphur for hair), absorbable minerals copper, zinc, iodine and selenium, together with the vitamins A, B complex, E and both Omega 3 and 6 fatty acids.**
- 8. The Equine Joint Care product is effective and simple to use; sprinkled onto food it provides collagen hydrolysate, alfalfa powder (also known as lucerne), dextrose monohydrate (also known as alpha d-glucose), glucosamine and chondroitin.**
- 9. Xenca Pet Collagen is a pure food grade product (suitable for human consumption), clinically shown to repair soft joint tissue and fight aches, pains and the effects of osteoarthritis.**
- 10. The Xenca Pet Care range is easy to use, with cost-effective dosages based on an animal's weight.**
